INDEX TO VOLUME XXIII.

A

Academy of Sciences of California, Proceedings of, 299.
of St. Louis, Transactions of, 450.
Academy Nat. Sci. Philad., vol. iii, part iii, noticed, 151.
Proceedings of, 152.
Acclimation, Society of, 107.
Aërostats, 109.
African, Livingston's discoveries, 139.
Agassiz, L., young Gar Pikes of Lake Ontario, 284.
Alcohol, products of oxydation of, 268.
Aluminium, manufacture of, 111.
alloys of, 265.
Ammonia-cobalt bases, *Gibbs* and *Genth*, 234, 319.
Amorphism, von *Fuchs* on, 227.
Anatomical models, 147.
Aneroid, observations with, *H. Poole*, 146.
Ansted's Geology and Mineralogy, noticed, 148.
Arago, works of, 444.
Archimedes, *J. Hall* on, 203.
Artificial milk, 114.
Artesian well at Passy, 108.
Astronomical charts of the ecliptic, 108.

B

Bache, A. D., Tides of Gulf of Mexico, 1.
on Prediction tables for Tides of U. S. coast, 12.
on cause of increase of Sandy Hook, 16.
tidal wave of Hudson River, 17.
European plagiarisms, 139.
Bailey, J. W., examination of Atlantic soundings, 153.
Obituary of, 447.
Bakewell, R., on the Falls of Niagara, 85.
Barometer, *Secchi's* new, 291.
Barometric action during a tornado, *J. Chappellsmith*, 18.
Binney's "Terrestrial Mollusks," etc., to be continued, 292.
Blake, W. P., telluret of silver, Cal., 270.
Blood, on fluorine in, *Nicklès*, 101.
Boracic acid, quantitative determination of, 268.
Boron, *Wöhler* and *Deville*, 433.
Boston Soc. Nat. Hist., Proceedings of, 152, 309, 452.
Botany, notices of works by *A. Gray*—of *De Candolle*, 127; *W. A. Bromfield*, 127; *Seemann*, 127; *G. Engelmann*, 128; *W. S. Sullivant*, 129; *A. Henfrey*, 278; *A. Gray*, 280, 439; *Sullivant* and *Lesquereux*, 438; *Ravenel*, 439.
Botany of Northern U. States, statistics of plants, *A. Gray*, 62, 369.
of Madiera, &c, origin of species, 130.
cause of opening and closing of Stomates, *H. von Mohl*, 280.
Bromfield's Flora Vectensis, noticed, 127.
Buff, H. S., on some compounds of Ethylene, 176.

C

California Acad. Sci., Proceedings of, 299.
See farther, *Geology*.
Canada, see *Geology*.
Capillarity, 445.
Carbonic acid, agency of, in past time, von *Fuchs*, 229.
Carboniferous limestones of the Mississippi valley, *J. Hall*. 187.
rocks of Kentucky, 274.
Carpenter, W. B., on the Microscope, noticed, 149.
Cactaceæ of the U. States, *Engelmann*, 128.
Caoutchouc, tree producing, 107.
Chandler, C. F., Miscellaneous Chemical Researches, noticed, 149.
Chappellsmith, J., barometric action during a tornado, 18.
Clausius, R., mechanical theory of heat, 25.
Climate, see *Meteorology*.
Coal, cannel, *J. S. Newberry* on formation of, 212.
fields of the E. Indian Archipelago, 157.
Coan, T., volcanic action on Hawaii, 435.
Comet, first of 1857, 447.
Coral reefs, agency of, in forming Florida, *J. LeConte*, 46.
Crystallogeny, facts in, 114.

D

Dalton, J., Memoir on, noticed, 449.
Davis, N. K., meteor of July 8th, 138.
Dead Sea, *H. Poole*, 290.
DeCandolle's Prodromus, noticed, 126.
Dudley Observatory, meridian instruments of, *B. A. Gould*, 404.

E

Earthquakes in California, *J. B. Trask*, 341.
Eisenlohr, wave length of most refrangible rays, 116.
Electric illumination, 440.

Electricity, *Dellmann's* method of observing atmospheric, 288.
Electrodynamic measurements, 430.
Elevation of Alleghany Mts., 62.
Elevations of Dead Sea, etc., 146.
Elliot Soc. Nat. Hist., Proceedings of, 304.
Ethylene, compounds of, *H. S. Buff*, 176.

F

Fitch on Noxious Insects, noticed, 150.
Flora of Northern U. States, Statistics, *A. Gray*, 62, 369.
Florida, formation of, *J. LeConte*, 46.
Fossil coral, note on Palæotrochis of *Emmons*, 278.
Archimedes, *J. Hall*, 203.
Fossils of Longmynd Rocks, reference to, 299.
vertebrate, of N. Carolina, *J. Leidy*, 271.
Fossil, see further *Zoology*.
Fluorescence, new case of, *J. W. Mallet*, 434.
Fluorine in the blood, *Nicklès*, 101.
Fuchs, biography of, 95, 225.

G

Galvanic battery with a constant current, 441.
with triple contact, 442.
theory of, *De la Rive*, 113.
Genth, F. A., Contributions to Mineralogy, 415.
on Ammonia-cobalt bases, 234, 319.
Geographical discoveries in Africa, *Livingston*, 139.
distribution, as bearing on the probable origin of species in the Azores, Madeira and the Canaries, *O. Heer*, 130.
Botany of U. States, and relations to other countries, *A. Gray*, 62, 369.
Geological note on Dead Sea, *Poole*, 290.
survey of Kentucky, noticed, 272.
of Wisconsin, ordered, 437.
Society of London, Journal, noticed, 299.
Geology of California, facts in, 299.
of Canada, on the Huronian and Laurentian rocks in, *J. D. Whitney*, 305.
Gerhardt, obituary of, 102.
Gibbs, W., Chemical abstracts, 116, 265, 430.
on Ammonia-cobalt bases, 234, 319.
Gillespie, Problem in Surveying, 224.
Glass, soluble, *Fuchs*, 100.
Glycerine, action of the iodid, chlorid and bromid of phosphorus on, 267.
Glycol, 266.
Gould, B. A., Meridian Instruments of the Dudley Observatory, 404.
Gray, A., Botanical notices, 126, 278, 438.
Statistics of Flora of Northern U. States, 62, 369.
Greg, R. P., meteoric iron containing lead, 118.
Gregory's Chemistry, American edition by Sanders, noticed, 296.
Guano of Monk's Island, *A. S. Piggot*, 120.
J. Higgins and *C. Bickell*, 121.
Guyot, A., formula of progress in the earth's physical history, 147.

H

Hall, J., on the Carboniferous Limestones of the Mississippi valley, 187.
Hall, J., on the genus Archimedes or Fenestella, 203.
Hallowell, E., list of Reptiles of some W. India islands, 282.
Heer, O, origin of species living in the Azores, Madeira and the Canaries, 130.
Hennessy, on isothermal lines, 144.
Higgins, J., on Columbian Guano, 121.
Hildreth, S. P., meteorological Journal kept at Marietta, 1856, 215.
Holton, I. F., on New Granada, noticed, 448.
Hopkins, W., on Screw-propellors, 60.
Hunt, T. S., reactions of alkaline silicates, 437.

I

Infusoria of soundings, *J. W. Bailey*, 153.
Insects, noxious, *Fitch* on, noticed, 150.
Isothermal lines, *Hennessy* on, 144.

J

Jackson, C. T., on verd-antique, 123.
Johnson, S. W., translation of biography of von Fuchs, 95, 225.
Jones, G., on the Zodiacal light, 150, 161.
on a shower of ashes about Quito, 276.
on Zodiacal light, observations at Quito, 285.

K

Kobell, biography of von Fuchs, 95, 225.

L

Lead in meteoric iron of Chili, *Greg*, 118.
LeConte, J., formation of Florida, 46.
Leidy, J., vertebrate fossils of N. Carolina, 271.
on a boring sponge, 281.
notice of papers by, 450.
Lenses made for illumination, from sections of hollow spheres, 443.
Light for light-houses, &c, 442.
Light, wave length of most refrangible rays, *Eisenlohr*, 116.
Lithia, preparation of, 266.
Lithia and magnesia, separation of, *J. W. Mallet*, 427.
Livingston, discoveries in Africa, 139.
Longitude determinations, American method claimed abroad, 139.

M

Mallet, J. W, on the rose-colored mica of Goshen, 180.
analyses made for geological survey of Alabama, 181.
on Red Sulphur, 185.
separation of lithia and magnesia, 427.
supposed new case of fluorescence, 434.
Marble, verd antique, *C. T. Jackson*, 123.
Mastodon in California, 292.
Metals, organic compounds containing, 269.
Metamorphism, thoughts on, *von Fuchs*, 229.
through alkaline silicates, *T. S. Hunt*, 437.
Meteor of July 8th, 1856, *N. K. Davis*, 138.
T. M. Peters, 287.
Meteoric iron from Chili, containing native lead, *R. P. Greg*, 118.

Meteorological Journal at Marietta, for 1856, *S P. Hildreth*, 215.
Meteorology of Iowa, *T. S. Parvin*, 360.
Microscope, *Carpenter* on, noticed, 149.
Microscopic examination of soundings, *J. W. Bailey*, 153.
Milk, artificial, 114.
MINERALS—
Bismuthite of Sweden, *Genth*, 415.
of Brewer's mine, S. Carolina, *Genth*, 426.
Cantonite, *N. A. Pratt*, 409.
F. A. Genth, 415.
Cherokine is Pyromorphite, 421.
Corarite is Pitchblende, 421.
Dufrenite of New Jersey, 423.
Enargite, *F. A. Genth*, 420.
Epistilbite of Iceland, 421.
Greensand of Alabama, *J. W. Mallet*, 182.
Harrisite, *N. A. Pratt*, 409.
F. A. Genth, 415.
Hitchcockite, analysis of, 423.
Lanthanite, analysis, 423.
Linnæite of Maryland and Missouri, 418, 419.
Marble of Alabama, *Mallet*, 181.
Mica of Goshen, *J. W. Mallet*, 180.
Porcelain clay of Alabama, *J. W. Mallet*, 183.
Siegenite of Maryland and Missouri, 419.
of Mine la Motte, Mo., 419.
Telluret of silver in California, *W. P. Blake*, 270.
Vivianite of New Jersey, 421.
Wavellite of Chester Co., Pa., 423.
Mineralogy, *C. U. Shepard's*, published, 148.
Mohl, H. von, cause of opening and closing of Stomates, 280.
Moon, color during eclipses, 444.
Morfit's Chemical and Pharmaceutical Manipulations, noticed, 149.
Mortars, von *Fuchs* on, 225.

N

Newberry, J. S., on the formation of cannel coal, 212.
New York harbor encroachments, *A. D. Bache*, 16.
Niagara, *R. Bakewell* on, 85.
Nicklès, J., correspondence of, 102, 440.
Fluorine in blood, 101.
N. Carolina, fossils of, *Leidy*, 271.

O

Observatory at Paris, 444.
OBITUARY—Bojer, 148, 279.
J. W. Bailey, 447.
G. Don, 279.
Dozy, 279.
Dunal, 279.
N. M. Hentz, 148.
Liebmann, 276.
Hugh Miller, 294.
W. C. Redfield, 292.
Dr. Scoresby, 448.
von Steudel, 279.
M. Tuomey, 448.
Wm. Yarrell, 148.
Wikström, 279.
Ordway, J. M., on some soluble salts of Tin, 220.
Organic compounds containing metals, *Frankland*, 269.
Owen, on the aboriginal ruminants of Britain, 132.
Owen's Report on Kentucky, noticed, 272.
Ozone, work by *Scoutetten* on, noticed, 446.

P

Parvin, T. S., Climate of Iowa, 360.
Patent Office Report for 1855, 150.
Perfumes, industry of, 109.
Photography, exhibition of, 115.
Peters, T. M., meteor of July, 1856, 287.
Photometer, a new, *Silliman* and *Porter*, 315.
Piggot, A. S., on Guano, 121.
Plants, see *Botany*.
Pratt, N. A., sulphurets of copper of Canton, Ga., 409.
Proportions in human body, 445.

R

Redfield, W. C., Spirality of motion in tornadoes, 23.
on the avoidance of Cyclones, 205.
Reptiles, see *Zoology*.
Rive, De la, Treatise on Electricity of, noticed, 115.
Rogers, W. B., Ruhmkorf's apparatus made in Boston, 451.
Rose, tantalum and its compounds, 116.

S

Sandy Hook increase, *A. D. Bache*, 16.
Schmidt, H. B., anatomical models of, 147.
Screw-propellors, *W. Hopkins*, 60.
Scrope, G. P., on craters, 346.
Seemann's Botany of the Herald, noticed, 127.
Serpentine marbles, *C. T. Jackson*, 123.
Shepard's Mineralogy, noticed, 148.
Silica, soluble, *Fuchs*, 100.
Silliman, Jr., B., on a photometer, 315.
Smithsonian Contributions, vol. viii, noticed, 150.
Institution, list of works published by, 300.
Soda manufacture, new method, 443.
Specula, polishing, *R. Greene*, 145.
Sponge, a boring, *J. Leidy*, 281.
Steam engine, mechanical theory of heat in, *R. Clausius*, 25.
Stereochromy, 101.
Stimpson, W., collections by, in North Pacific Expedition, 136.
Prodromus of, noticed, 451.
Storm, barometric action during, *J. Chappellsmith*, 18.
Storms, spirality of whirlwind, *W. C. Redfield*, 23.
on avoiding, *J. Rodgers* and *A. Schönborn*, 205.
Sullivant's Musci and Hepaticæ of the U. States, noticed, 129.
Sulphuric acid, action of, on nitriles and amids, 269.
Surveying, problem in, *W. M. Gillespie*, 294.
Sylvester's Quarterly Journal of pure and applied Mathematics, 149.

T

Tantalum and its compounds, *Rose*, 116.
Telegraph, nautical, 442.
Telegraph, submarine, in the Mediterranean, 107.
Telescopes, polishing specula for, *R. Greene*, 115.
Temperature, isothermal, *Hennessy*, 144.
Terraces or beaches on Western Islands, 299.
Tides of Nova Scotia, *Chevallier*, 289.
of Gulf of Mexico, *A. D. Bache*, 1.
of the U. S. Coast, prediction tables for, *A. D. Bache*, 12.
Tidal wave in Hudson river, *A. D. Bache*, 17.
Tin, on some soluble salts of, *J. M. Ordway*, 220.
Tornado, see *Storm*.
Trask, J. B, earthquakes in California, 341.
Triphenylamin, 268.

U

Urea, formation of by oxydation of albuminous matters, 268.
origin of, in animal economy, 112.

V

Volcanic action on Hawaii, 435.
ashes, shower of, about Quito, *G. Jones*, 276.
Volcanoes, *Scrope* on, 346.

W

Wax tree from China, in France, 107.
Whirlwind, see *Storm*.
Whitney, J. D., on the Huronian and Laurentian systems of rocks, 305.

Z

Zodiacal light, *G. Jones*, 150.
Zoology, aboriginal ruminants of Britain, 132.
young gar-pikes of Lake Ontario, *L. Agassiz*, 284.
a boring sponge, *J. Leidy*, 281.
list of reptiles of some W. India Islands, 282.
fossil Dicotyles, *J. Leidy*, 450.
Zoological collections of North Pacific Expedition, *Stimpson*, 136, 451.
papers by *J. Leidy*, 450.
